FOR IMMEDIATE RELEASE

Trussway Adds Manufacturing Plant in North Carolina

HOUSTON – March 15, 2007 – Trussway, Ltd. announced today plans to build a multifamily truss manufacturing plant in North Carolina. The plant, in Clinton, N.C., will support Trussway operations located near Atlanta, Ga., and Fredericksburg, Va.

“Trussway’s Clinton plant will initially produce roof trusses and floor trusses for multifamily builders throughout North and South Carolina,” says Trussway President and CEO Bill Adams. “We will add production of TRO’s (Trussway Rough Openings) soon after launching. The plant’s location in Sampson County provides easy access to I-40 and I-95 and will allow Trussway to better reach the strong markets of Raleigh, Greensboro, Wilmington and Charlotte, N.C., as well as Columbia, Charleston and Hilton Head, S.C.”

“Trussway has served the Carolina markets for years from our Atlanta and Fredericksburg facilities,” explains David Neves, Trussway VP/GM Eastern Division. “The Clinton plant will allow us to reduce shipping times to our customers and develop new accounts by placing us closer to key markets. The Clinton operation will supplement the service and enhance the strengths of the well established Atlanta and Fredericksburg facilities.”

Trussway will begin updating, upgrading and installing equipment in the Clinton site immediately and expects to begin shipping product as early as May. Trussway expects to add some thirty manufacturing jobs to the local economy at startup, and once the plant is at full capacity will employ up to sixty people.

Trussway has become the multifamily market leader in wood trusses and components by providing expert products and services to customers from coast to coast. It recently added a turnkey division called Builder Services Group (BSG), which provides labor, trusses, lumber and project management in select markets.

ABOUT TRUSSWAY

Trussway, Ltd is one of the nation's largest manufacturers of structural building components. It sells, designs, and manufactures roof trusses, floor trusses, openings and components for the multifamily, military and student housing markets as well as light commercial and single family tract building markets. The company's multifamily plants are located in Houston and Fort Worth, Texas; Phoenix; Atlanta; Orlando, Fla.; Fredericksburg, Va.; and Indianapolis, Ind. Trussway also operates a single family manufacturing plant in Sparta, Mich.

Trussway has more than 1,400 employees and sells to the majority of general contractors serving the multifamily construction market in the United States.
